Summary

I am a dedicated **Software QA Engineer at Creative Labs**, focused on delivering high-quality audio products through meticulous manual testing and the initiation of automation frameworks using Katalon Studio. Currently, I am balancing my full-time professional role with a **Bachelor of Technology in Information Technology at SUSS** to further bridge the gap between development and quality assurance.

Beyond my professional role, I am a passionate builder of personal projects, such as **linkupcalendar.app**, where I apply my skills in full-stack development and user-centered design to solve real-world problems.

Experience

Creative Labs Pte Ltd — Singapore
Software QA Engineer — September 2023 - Present

- Execute and modify test cases in TestRail to streamline reporting.
- Log and track defects using Mantis with a focus on issue isolation.
- Perform manual testing across Windows, iOS, Android, and macOS.
- Initiating automation testing using Katalon Studio.

Zionext Pte Ltd — Singapore
Software Engineer — March 2021 – July 2021

- Developed server-side applications using ASP.NET and mobile apps for Android.
- Contributed to a government project with high-quality deliverables.
- Utilized Agile, JIRA, and Git for version control and task management.

MQ Spectrum Pte Ltd
